

INNER TIE RODS

QUALITY FIRST. ENGINEERED TO LAST.®

Acument Global Technologies stands as one of the few manufacturers with the capability to supply our customers with varying lengths of tie-rods. With our competitive pricing and engineering knowledge, we pride ourselves on our ability to provide the best solution possible. Our fully-automated process, FORMAX® Machines, as well as our world-class changeover time allows us to offer the best pricing possible on tie rods. We also offer a larger range of products with our five and six die cold formers that give us the ability to produce longer tie-rods than our competitors.

FEATURES

- ▶ Ball diameters from 20mm to 32mm, with lengths up to 340mm
- ▶ Thread size from M12 to M20
- ▶ Cold forged using either micro-alloy or heat-treatable material
- ▶ Can provide as forged or machined condition

BENEFITS

- ▶ Cost-competitive
- ▶ Able to provide engineering support to optimize design
- ▶ In-process crack detection

IDEAL APPLICATIONS

- ▶ Steering Linkage
 - ▶ Inner Tie Rods
