

# MAGNASEAL®

## SELF-SEALING THREADED PLUGS

Standard plugs, even used with sealing compounds and washers, are prone to spiral leaks. Magnaseal® Self-Sealing Plugs have two annular sealing rings that maintain a liquid tight seal even after repeated installation and removal. Magnaseal® Self-Sealing Plugs have proven so effective that they eliminate the need for separate sealing washers or sealing compounds, and the dual sealing rings allow multiple removals and reinsertions.

### FEATURES

- ▶ Two integral annular sealing rings
- ▶ Torx Plus® Drive System
- ▶ Can be supplied with or without a magnet

### BENEFITS

- ▶ Eliminates spiral leakage
- ▶ High pressure sealing capability
- ▶ Eliminates washers and sealing compounds
- ▶ High torque transfer capability
- ▶ Fully field servicable

### IDEAL APPLICATIONS

- ▶ Drain & Fill Plugs
- ▶ Pneumatics
- ▶ Hydraulic Systems
- ▶ Oil Galleries
- ▶ Access Holes

## APPLIED SOLUTIONS

### SPECIFICATIONS

- ▶ Available in all standard metrics sizes from M8 through M28

### HOLDING THE WORLD TOGETHER

Leaks are a thing of the past. With its 360° full contact annular rings and Torx Plus® drive style, Magnaseal® Self-Sealing Plugs are a high performance and servicable solution that can provide cost savings in both your assembly process and repair operations.
